Class Diagram
AppState
+ device SerialPort
+ transport Transport
+ esploader ESPLoader
+ chip string
+ monDevice SerialPort
+ monTransport Transport
+ monRunning boolean
+ fileEntryId int
+ setStatus(state, text) void
+ showAlert(msg, type) void
+ showToast(msg, type) void
+ addFileEntry() void
+ cleanUp() void
BSI Theme Bridge
+ APP_THEME_KEY string
+ isEmbedded boolean
+ applyBsiTheme(theme) void
+ mapTheme(raw) void
+ bsiToggleTheme() void
+ bsiSetTheme(theme) void
creates
manages list
creates
ESPLoader
+ transport Transport
+ baudrate int
+ terminal EspLoaderTerminal
+ debugLogging boolean
+ main() void
+ writeFlash(opts) void
+ eraseFlash() void
FileEntry
+ address hex
+ data Uint8Array
+ fileName string
+ progressBar Element
uses
logs to
Transport
+ device SerialPort
+ tracing boolean
+ connect(baud) void
+ disconnect() void
+ rawRead() void
+ rawWrite(data) void
+ getInfo() void
+ returnTrace() void
+ waitForUnlock(ms) void
EspLoaderTerminal
+ clean() void
+ writeLine(data) void
+ write(data) void
delegates to
xterm.Terminal
+ cols int
+ rows int
+ theme object
+ scrollback int
+ open(container) void
+ write(data) void
+ writeln(data) void
+ clear() void
+ reset() void
loads
FitAddon.FitAddon
+ fit() void
